Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Household Physics During recent years there has been an increased call for Physics as part of a high school course. At the same time there has been a decided dislike for the subject as it has been presented. To meet both of these conditions, this book has been prepared. Much has been said about the value of mathematics and science as a means of mental discipline. The writer's belief is that it is the excessive attention paid to the mathematical side of Physics, together with the development of formulas, that has made the subject so difficult for the average student. There can be just as good mental training in developing the thought that enables a pupil to answer a set of questions selected from every-day experiences, as can be obtained from the ability to solve a mass of problems, many of which have no connection with the life of the pupil, and therefore mean little to him. The object of Household Physics is to present those phases of Physics which enter into the daily household life, introducing each principle by means of some well-known application, then explaining the principle, and finally presenting other applications as a means of clinching the principle; first the known, followed by the unknown, and ended by the known. At the end of each main group of principles appears a set of questions on that group. At the end of each chapter is a set of questions covering the different groups in the chapter. At the end of the book are questions covering the different chapters. There is thus opportunity for three reviews, each covering a larger field than the...
