

How the Universe Forms: Proving the Titius Bode Law Working

By Peet (P S J) Schutte

Createspace, United States, 2014. Paperback. Book Condition: New. 279 x 216 mm. Language: English . Brand New Book ***** Print on Demand *****. There are four cosmic laws in nature applying that form gravity namely: 1) The Titius Bode law 2) The Lagrangian points 3) The Roche limit 4) The Coanda effect. This is nature and this is what science ignores in favour of covering Newton s mistakes. The total comprehension of influence in physics that these four cosmic principles have is so involving it requires volumes of books just to introduce the totality of information, and yet up to now science made no effort in studying these four laws. These four laws prove what gravity is because gravity is not what science says it is. These four laws are nature s way of forming gravity. If you never heard of this before, then ask why because these four laws build the solar system and therefore the Universe. These laws are hidden behind a conspiracy of silence. What you are about to read is the mother of all the conspiracies in science. You are going to read about how science applies a system of mind control with thought processing. Every conspiracy...

Reviews

Extensive information for book fans. It is written in basic words and never hard to understand. It is extremely difficult to leave it before concluding, once you begin to read the book.
