Reviews

A high quality pdf as well as the typeface applied was exciting to see. It really is written in simple words and phrases rather than difficult to understand. You will not really feel monotony at any time of your time (that's what catalogs are for relating to in the event you question me).

Neuware - The first steps towards restructuring and reorganizing the institutions and legislation of the Iraqi oil and gas industry must include taking ownership of resources, allocating acreages to Iraqi Kurdistan and neighbour states, improving the transparency as well as governmental participation and fiscal principles. It is important to provide an institutional framework that governs the operations of the industry, including its functions, structure, powers and funding. Operations in the upstream of the industry comprise licenses, leases and contracts. Other considerations covered are award processes, right of governmental participation, marginal fields, indigenous companies, termination and revocation of both licenses and leases, matters on fees, rents and royalties and, finally, provisions on Associated Natural Gas. The legislation in the downstream sector focuses on licensing, refining, marketing and pricing of oil products, transport logistics and facility management companies, pipelines and depots. The operating stocks and Iraq strategic stocks are also necessary. The needs of the downstream natural gas include both technical and commercial licensing regulations and conditions, as the network, gas supply licenses, transportation pipelines licenses and the whole sale market in addition to the possibility of third party access, customer protection, the pricing regime, public service obligations, competition and market regulation. The legislation is an amendment to the existing Iraqi Technical Service Contracts (TSC) and Production Sharing Contracts Agreements (PSC) in Iraqi Kurdistan based on the need to create a new fiscal framework that takes various compelling issues into consideration. It needs to capture the full gas value chain for taxation purposes in order to develop a fiscal regime for gas removed from oil and to create thereby a level playing field for all investors in gas and promoting...
